Official Notice

New Patent & SPC e-filing system is now available

The Patents Office is pleased to announce the launch of our new Patent & Supplementary Protection (SPC) e-filing facility. This new development, became available on 1 August 2019, to facilitate the filing of all Patent & SPC applications on-line via the Patents Office website home page. It will also be possible to file an online application for an Extension of the Duration of an SPC.

The new e-filing system introduces an easy to navigate online application form and makes provision for the uploading of all patent specification documentation. The e-filing functionality also facilitates the electronic payment of patent & SPC filing and application fees by credit or debit card. Automatic error checking helps ensure that users input the correct data and a fee counter provides information on the cost of the application. The submission process is straightforward and results in an online confirmation receipt that includes a provisional application number which can be printed or saved.

In addition, the Office has developed a stand-alone online tool to assist applicants with their patent documents called the Patent Specification Template Tool. This tool is a template which assists applicants in correctly constructing the documents that form part of the patent specification. This is also accessible via the website home page.

The introduction of the Patent and SPC e-filing means that the Patents Office can now accept online applications for all IP Rights, including trade marks and designs.

Applications for Patents From 04/07/2019 to 10/07/2019

The names of applicants are in alphabetical order. In the case of joint applicants, each name is given independently. The title of the invention should not be regarded as an exhaustive indication of the subject-matter. The date immediately following the title is that on which the application was filed; in the case of a divisional application, the filing date of the earlier application is added within parentheses. In the case of a Convention application the Convention country and priority date(s) claimed are given in square brackets and where an application claimed the priority of an earlier application filed at the office, this information is given within the square brackets. The number is that of the application and should be used for correspondence purposes up to the date of grant of a patent. The letter S preceding the number indicates that the application is for a short-term patent. A new number will be given when a patent is granted and this new number should be quoted in all correspondence subsequent to grant.
