Official Notice

Patent Rules 1992 – Rule 77, – Office Closure

The Intellectual Property office of Ireland (IPOI) will be closed for the transaction of business on the following date:

Monday 07th August 2023

Applications for Patents From 26/06/2023 to 13/07/2023

The names of applicants are in alphabetical order. In the case of joint applicants, each name is given independently. The title of the invention should not be regarded as an exhaustive indication of the subject-matter. The date immediately following the title is that on which the application was filed; in the case of a divisional application, the filing date of the earlier application is added within parentheses. Where an application has been filed pursuant to Section 127A, the filing date shall be either the date of the originating PCT filing, where applicable, or the date directed by the Controller. Where the application invokes the Paris Convention, the Convention country and priority date(s) claimed are given in square brackets. Where an application claimed the priority of an earlier application filed at this Office, this information is given within the square brackets. The number is that of the application and should be used for correspondence purposes up to the date of grant of a patent. The letter S preceding the number indicates that the application is for a short-term patent. A new number will be given when a patent is granted and this new number should be quoted in all correspondence subsequent to grant.

Applications Published Under Section 28

The following applications become open to public inspection as from the date of this issue of the journal unless otherwise specified. The date given is the date of filing of the application or the earliest priority claimed. Any application made pursuant to Section 127A, where the originating PCT application has been published under that PCT in English, is accorded the PCT publication date of that application. For these Section 127A applications, the publication date is given in bold square brackets.

Patents Granted Under Section 34

The number of a patent is given in heavy type; the letter S preceding the number indicates a short-term patent. The code numbers following the title of each invention are those of the International Patent Classification. The date of filing the application follows the proprietor's name. The patent application number, which follows the date of application in parenthesis, has been superseded by the patent number. In the case of an application claiming the priority of an earlier application, the name of the country where the earlier application was made and the date of the earlier application are shown in square brackets.

By virtue of Section 65(3), the application relating to any short-term patent appearing in the following list whose date of filing is later than the date which is 18 months prior to the date of this issue of the Journal becomes open to public inspection as and from the date of this issue of the Journal.

Patents Granted Under European Patent Convention Designating Ireland

The Irish serial number appears first followed, respectively, by the proprietor's name, the date of filing of the application, the filing number and the European Patent Office publication number.

If the specification of the European patent was published in French or German the word 'French' or 'German', as appropriate, will appear as the last item of information.

Correction of Goods and Services for International Trade Mark No.0927142 recorded in the International Register on 14/11/2022.
Class 04 limited to:
Liquid fuel and lubricants for vacuum pumps; greases for vacuum sealing; all the aforementioned goods of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields: welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparel, welding accessories, welding flux, cutting products.
Class 07 limited to:
Machines and machine tools; coating machines for tools and components; coating machines for for optical and magnetic data storage media; surface treatment machines for coating and etching of components and monitors; vacuum coating components and spare parts (included in this class), namely vacuum ducts, vacuum valves, vacuum reversing devices, control units, substrate carriers; vacuum pumps; rotary vacuum pumps, propellant pumps; condensation vacuum pumps; sorption pumps; parts of vacuum chambers, namely, vacuum blocking slides, vacuum valves, vacuum connections and vacuum chambers components; separators; filters for vacuum pumps; machines for low-temperature engineering; surface treatment machines for operation under coarse vacuum, fine vacuum, high vacuum and ultra-high vacuum; vacuum machines for drying, freeze-drying, degassing, filling, impregnating, mixing, melting, atomizing, vaporizing, evaporation coating or coating of materials; vacuum heat treating machines for metals; vacuum coating machines for optical and magnetic data storage media; electric energy supply generators for space equipment, space probes, space stations, space laboratories and

satellites, substantially consisting of mercury vapor turbines heated by bundled sunrays, automatic assembly machines for the semiconductor industry; production machines for the manufacture of flat screens; ultrasonic cleaning machines for substrates which are to be coated in a vacuum apparatus; engines for space vehicles, in particular recoil engines, ramjet engines, solid-propellant and liquid-propellant rocket engines, gas turbine engines, also ion drive engines (for space crafts); parts of engines; all the aforementioned goods of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields: welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparel, welding accessories, welding flux, cutting products.

Class 09 limited to:
Optical apparatus and instruments; optical components and systems for data and video projection, lighting industry, sensor systems, instrument construction and biotechnology; optical apparatus and its components with surface coatings; components and spare parts for vacuum coating apparatus, namely electronic control and regulation units; total pressure sensors, measuring devices and control devices, namely for the measurement of the total pressure in vacuum apparatus, partial pressure gages for vacuum apparatus; gas analysis devices, in particular for the determination of the gas composition at low and high pressures; electronic leak location devices for the finding of leaks in vacuum-tight containers and in air-tight containers, electronic chip carrier cleaners for the surface cleaning of electronic components; vacuum coating equipment, namely, sputtering cathodes, sputtering targets, sputtering shields, sputtering masks, evaporation coating filaments, ceramic crystals (included in this class); devices for the reception, transmission, transfer, receiving, reproduction and processing of sounds, signals and/or images; communication satellites, transmitters, devices of wired and of wireless information retrieval

engineering, of information transfer engineering and of information processing engineering, including ultra-high frequency engineering and acoustics, radio direction apparatus, radar and radio locating devices, radar probes and navigation devices, laser devices for the retrieval, transfer and processing of information, sonar devices, night-vision devices, ultrasonic devices, photoelectrical measuring, control and regulating devices, remote steering devices for the generation and wireless or wired transmission of control and steering signals to unmanned and manned land, air and water vehicles as well as to unmanned missiles and space equipment as well as apparatus composed of these devices; controlling devices for space electronics; semiconductors; integrated circuits; electrotechnical vibration meter components (included in this class); measuring, regulating, controlling and monitoring devices for vacuum pumps; sealing heater test apparatus; vacuum measuring devices; partial pressure gages; layer thickness gages and regulating devices; gas analysis devices; machine-like leak location devices; solar-electrical, photoelectrical and thermo-electrical energy converters as well as solar-thermal and photothermal energy converters, solar cells, devices for the absorption of the emission spectrum of the sun and for the reproduction of an emission spectrum comparable to that of the sun; satellites and parts of satellites; all the aforementioned goods of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields: welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparel, welding accessories, welding flux, cutting products.

Class 12 limited to:
Space vehicles, namely, unmanned aircraft, in particular remote-controlled aircraft with or without recoil drive; spacecrafts, in particular, space probes, controllable space rockets, parts of space vehicles (not included in other classes); payload fairings as parts of aircrafts for

rockets or missiles; all the aforementioned goods of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields: welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparel, welding accessories, welding flux, cutting products.

Class 40 limited to:

Treatment of materials; all the aforementioned services of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields: welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparel, welding accessories, welding flux, cutting products.

Class 42 limited to:

Scientific and industrial services as well as related research and development services; industrial analysis and research; design and development of computers and computer programs; all the aforementioned services of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields: welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparel, welding accessories, welding flux, cutting products.
