NOTE: *The office does not guarantee the accuracy of its publications nor undertake any responsibility for errors or omissions or their consequences.*

In this Part of the Journal, a reference to a section is to a section of the Patents Act, 1992 unless otherwise stated.

Applications for Patents From 28/07/2023 to 10/08/2023

The names of applicants are in alphabetical order. In the case of joint applicants, each name is given independently. The title of the invention should not be regarded as an exhaustive indication of the subject-matter. The date immediately following the title is that on which the application was filed; in the case of a divisional application, the filing date of the earlier application is added within parentheses. Where an application has been filed pursuant to Section 127A, the filing date shall be either the date of the originating PCT filing, where applicable, or the date directed by the Controller. Where the application invokes the Paris Convention, the Convention country and priority date(s) claimed are given in square brackets. Where an application claimed the priority of an earlier application filed at this Office, this information is given within the square brackets. The number is that of the application and should be used for correspondence purposes up to the date of grant of a patent. The letter S preceding the number indicates that the application is for a short-term patent. A new number will be given when a patent is granted and this new number should be quoted in all correspondence subsequent to grant.

Patents Granted Under Section 34

The number of a patent is given in heavy type; the letter S preceding the number indicates a short-term patent. The code numbers following the title of each invention are those of the International Patent Classification. The date of filing the application follows the proprietor's name. The patent application number, which follows the date of application in parenthesis, has been superseded by the patent number. In the case of an application claiming the priority of an earlier application, the name of the country where the earlier application was made and the date of the earlier application are shown in square brackets.

By virtue of Section 65(3), the application relating to any short-term patent appearing in the following list whose date of filing is later than the date which is 18 months prior to the date of this issue of the Journal becomes open to public inspection as and from the date of this issue of the Journal.

A planter box or wall comprising bolt together panels which can be either straight or curved or corners. Any number of panels can be assembled together to create a box or contained area to be filled with soil and planted with grass, plants or trees. The panels are self-supporting by a ground level pole connected to the panels and acting as an anchor, when covered by soil, to maintain the alignment of the panels and resist the outward forces of the soil.

A device made from steel and/or plastic that attaches to any bike which allows the user to carry a hurl on the bike. The angle at which it attaches to the bike is adjustable via a swivel mechanism. The slots for this swivel mount are milled at a set radius which corresponds with the threaded holes on the backing plate. The hurl is secured to the holder using a fastener strap which runs through two slots. The holder is secured to the bike via a clamping mechanism which consists of four button head screws which are threaded into four adjacent nuts on a backing plate. The frame of the bike runs in between the screws and the paint is protected by rubber padding on both the backing plate and main plate. A small hole at the bottom of the curved part where the hurl sits allows for rain water to drain away.
