Applications for Patents

From 14/11/2025 to 27/11/2025

The names of applicants are in alphabetical order. The title of the invention should not be regarded as an exhaustive indication of the subject-matter. The date immediately following the title is that on which the application was filed; in the case of a divisional application, the filing date of the earlier application is added within parentheses. Where the application invokes the Paris Convention, the Convention country and priority date(s) claimed are given in square brackets. Where an application claimed the priority of an earlier application filed at this Office, this information is given within the square brackets. The number is that of the application and should be used for correspondence purposes up to the date of grant of a patent. The letter S preceding the number indicates that the application is for a short-term patent. A new number will be given when a patent is granted and this new number should be quoted in all correspondence subsequent to grant.

Patents Granted Under Section 34

The number of a patent is given in heavy type; the letter S preceding the number indicates a short-term patent. The code numbers following the title of each invention are those of the International Patent Classification. The date of filing the application follows the proprietor's name. The patent application number, which follows the date of application in parenthesis, has been superseded by the patent number. In the case of an application claiming the priority of an earlier application, the name of the country where the earlier application was made and the date of the earlier application are shown in square brackets.

Patents Granted Under European Patent Convention Designating Ireland

The Irish serial number appears first followed, respectively, by the proprietor's name, the date of filing of the application, the filing number and the European Patent Office publication number.

If the specification of the European patent was published in French or German the word 'French' or 'German', as appropriate, will appear as the last item of information. In such cases, it is necessary to file a translation in English and pay the prescribed fee, within six months of the publication date of the grant, in order that the patent may continue to have effect.

Scientific apparatus and instruments; optical apparatus and instruments; weighing apparatus and instruments; checking (monitoring) apparatus and instruments; data processing equipment; browsers, scanners, data processing equipment for non-medical purposes; lasers for non-medical use; measuring sensors, infrared sensors, Beta radiation sensor, laser triangulation sensors; apparatus for sound or image recording, transmission and reproduction; magnetic recording media, optical or sound recording disks; digital recording media; calculating machines, data processing equipment, computers; computer peripherals; electric batteries; electric wires; electric relays; diagnostic apparatus for non-medical use; integrated circuit cards [smart cards]; electric accumulators; electrical adapters; fiber-optic cables; transmitters of electronic signals; time recording apparatus; distance recording apparatus; tape recorders; optical fibers, light conducting filaments; quantity indicators; electric control apparatus, densimeters, densitometers, detectors, infrared detectors,

computer interfaces, gauges, software, electric measuring apparatus, precision measuring apparatus; measures, measuring, apparatus and instruments for physics, computer platforms, computer program, apparatus and installations for the production of x-rays, for non-medical purposes, x-ray apparatus for non-medical purposes, data processing apparatus, x-ray tubes for non-medical purposes; measuring, signaling, checking apparatus and instruments; optical sensors, x-ray sensors; apparatus and instruments enabling thickness, area density, density, composition, transparency, humidity, color, roughness and the appearance of defects to be measured and controlled in real time; calculators; software (recorded programs); x-ray detectors, laser diodes, microwave detectors, ultrasound detectors, interferometers, optical detectors; measuring instruments; ionization chambers, photomultipliers, scintillators.

- Class 42. Scientific research; computer system analysis; design and development of computers and software for measuring; research and development of new products for third parties in the field of precision measuring; technical project studies; computer system design; technological consultancy services; quality control; software development in the framework of software publishing; software development, software installation, maintenance of computer software; calibration; technical, physical, mechanical

research; electronic data storage; monitoring of computer systems for fault detection; remote monitoring of computer systems; design and development of measuring technology; research and development of new products for third parties in the field of precision measuring; massive data analysis computer services.

Changes/Corrections in the International Register

1851587 Advertised in Journal No 2556 on .03 December 2025. Class 35 amended as follows:
Class 35: Commercial trading and consumer information services, namely auctioneering services, rental of vending machines, agency services, organizing and arranging of business introductions, collective purchasing services, commercial evaluation services, preparation of competitions, negotiation of business contracts for others, business intermediary and advisory services in the field of selling products and rendering services, import and export services, negotiation and agency services, ordering services, price comparison services, procurement services for third parties, subscription services, retail and wholesale services relating to industrial facilities, containers of metal for storage and transport, cables and wires of common metal [not for electrical purposes], containers and transport and packaging items made of metal, waste containers [garbage containers] for industrial use made of metal, metal hardware, unprocessed and semi-processed materials of metal (not specified for use), locksmith goods, plants, devices and machines for the treatment of waste and metal scrap (in particular for pressing, shredding, compacting, mixing, compressing, cutting, conveying, discharging, sorting, extracting, recycling, separating, reprocessing, drying, dedusting, dewatering, packaging, stacking and disposing), presses (in particular hole-drawing presses, scrap presses, cotton presses, baling presses, packing presses, test presses, forging presses, bending

and straightening presses, briquetting presses, shearing presses, shear- packing presses, packaging presses, rotary shears, each of the aforesaid also operated electrically, pneumatically and hydraulically), shredding machines (namely mills, crushers and shears for shredding all kinds of materials such as, among others, metal scrap, metal shavings, slag, garbage, wood, paper, rubber, plastic, glass and carbon anodes, in particular scrap shears, press scissors and waste/garbage shears), scrap processing and recycling machines, dispensing machines, electric generators, couplings and devices for power transmission (other than for land vehicles), robots (in particular industrial robots, transport robots, waste processing robots), mechanical equipment for agriculture, earthworks, construction work, oil and gas extraction work and mining work (in particular presses, crushing machines and packaging machines), machine-operated apparatus for collecting and removing waste, machines and machine tools (for material processing and production, recycling, separating, shearing, cutting, shredding, chipping, pressing), power-operated tools, construction machines and equipment (for construction, demolition, cleaning and maintenance work), emergency and rescue machines and machine tools, machine tools, motors and engines (other than for land vehicles), motors, drives, machine parts and controls for the operation of machines and engines, drive devices for machines, pumps, compressors and blowers, conveyor systems and conveyor belts, hand-operated devices and tools for material processing as well as for construction, repair and maintenance work (in particular devices for changing machine parts in machines, e.g. in machines for processing, such as recycling, separating, shearing, cutting, shredding, chipping, pressing of any type of material, such as scrap shears, waste/garbage shears, shear presses, shear packing presses, packing presses, briquetting presses, rotary shears, machine tools), hand-operated devices for collecting and removing waste, lifting tools, knifeware (in particular for tools, equipment, machines and plants),

knifeware and cutting equipment (in particular for tools, equipment, machines and plants), cutting knives (in particular for tools, equipment, machines and plants), cutting belts (in particular for tools, equipment, machines and plants), saw blades (in particular for tools, equipment, machines and plants), cutting blades (in particular for tools, equipment, machines and plants), cutting discs on particular for tools, equipment, machines and plants, scientific, research, navigation, surveying, photographic, film, audiovisual, optical, weighing, measuring, signaling, detecting, testing, controlling, rescuing and teaching apparatus and instruments, scientific research and laboratory apparatus, teaching apparatus and simulators, apparatus, instruments and cables for electricity, apparatus and instruments for conducting, switching, converting, storing, regulating or controlling the distribution or use of electricity, control devices and computer-based controls, recorded data, recorded and downloadable media, computer software, blank digital or analog recording and storage media, computer programs and data carriers, information technology, audiovisual, multimedia and photographic devices, computers and computer peripheral devices, devices and instruments for recording, transmitting, reproducing or processing sound, images or data, magnets, magnetizers and demagnetizers, measuring, detection, monitoring and control devices, material testing instruments and machines, navigation, guidance, tracking, targeting and map making devices, optical devices, enhancers and correctors, safety, security, protection and signalling devices, scientific and laboratory devices for treatment using electricity, exhausts and installations for exhaust fumes, filters for industrial and household use, dry, wet and electrostatic filters for air regeneration, heating, ventilation, air conditioning and air purification devices and systems, industrial treatment installations, industrial installations for filtering liquids, installations for collecting gases, installations for collecting liquids,

installations for separating impurities from molten metals, combustion and pyrolysis plants, in particular waste incineration plants, devices for the thermal, chemical and radioactive disinfection of waste and facilities that come into contact with waste, personal heating and drying implements, assemblies for all the aforesaid goods, parts for all the aforesaid goods, wear and spare parts for all the aforesaid goods, accessories for all the aforesaid goods; rental and leasing of items in connection with the provision of the aforementioned services, included in this class; consultancy and information relating to the aforesaid services, included in this class.

Other classes remain unchanged.
